

Robert Sassack

Software Engineer

robsassack.com – rsassack25@gmail.com – 248-701-8497 – Metro Detroit, MI (Open to relocation)

Summary

Software engineer with 3+ years building and automating enterprise applications. Ships production web applications (Next.js, TypeScript, PostgreSQL, Docker) and on-device large language model (LLM) tooling (Gemini Nano, Chrome Prompt API). Strong background in continuous integration/continuous delivery (CI/CD) pipeline development and AI-assisted development workflows.

Skills

Languages: TypeScript, JavaScript, Python, SQL, PowerShell, Bash, HTML, CSS, Apex, SOQL

Frameworks: React, Next.js, Node.js, REST APIs, Stripe API

AI/LLM: LLM integration, prompt engineering, on-device inference (Gemini Nano / Chrome Prompt API), AI-assisted development

Platforms & Tools: Azure DevOps, Docker / Docker Compose, PostgreSQL, Redis, Git, Linux, FFmpeg, Salesforce Platform

Practices: CI/CD, automated testing and code coverage, Agile/Scrum

Experience

Software Developer, State of Michigan Apr. 2023 to Present

- Developed 2 production Azure DevOps CI/CD pipelines for a statewide Salesforce application (3rd in progress), including an automated Apex test coverage pipeline that downloads coverage artifacts, identifies low-coverage classes against the Git repository, and delivers HTML summary reports to the development team
- Executed 10+ full deployments across development, testing, and production environments
- Automated Azure DevOps workflows using Python and the Azure DevOps REST API, including bulk work item creation from CSV with dry-run support and Power Automate flows notifying Microsoft Teams channels on work item events
- Developed Salesforce platform features in Apex through sprint-based Agile development; previously maintained and enhanced a legacy Java application

IT Support Roles, Mobile IT LLC, Michigan State University, IBM Jun. 2019 to May 2022

- Delivered remote and on-site technical support across consulting clients, executive-level university staff, and enterprise deskside environments

Projects

GapCheck: Chrome extension for AI-powered resume analysis - github.com/robsassack/gapcheck

- Chrome Manifest V3 extension using an on-device large language model (Google Gemini Nano via Chrome's built-in Prompt API) to analyze job postings against a saved resume, producing a match score and classifying each requirement as covered, partial, or gap, with no backend, API keys, or user data leaving the browser

Merch Table: Self-hosted digital music storefront - merch-table.robsassack.com

- Full-stack e-commerce application (Next.js, TypeScript, PostgreSQL, Redis) with Stripe webhook-driven order fulfillment and a background FFmpeg worker transcoding uploads into multiple delivery formats; containerized with Docker Compose

Education

Bachelor of Science, Western Michigan University, Kalamazoo, MI

2020

Major: University Studies; Minor: General Business

Relevant Coursework: Computer Science I & II, Database Management Systems, Systems Programming Concepts, Computer Organization & Assembly Language
