

Robert Sassack

Software Engineer

rsassack25@gmail.com – 248-701-8497 – robsassack.com – github.com/robsassack

Summary

Software engineer with 3+ years delivering production applications across web, Salesforce, and Python environments. Experienced in automation, APIs, DevOps workflows, and shipping internal tools that improve efficiency. Daily user of AI-assisted development tools, with hands-on experience building full-stack projects using Next.js, TypeScript, and Docker.

Technical Skills

Languages: TypeScript, JavaScript, Python, HTML / CSS, Java, Apex, SOQL

Frameworks, Tools & Databases: React, Next.js, Node.js, Docker, Git, Azure DevOps, PostgreSQL, Redis, MySQL, Salesforce Data Loader

Platforms & Systems: Linux / Unix, Windows, macOS, Azure Pipelines, TrueNAS, Salesforce

AI Tools: ChatGPT / Codex, Claude / Claude Code, GitHub Copilot

Professional Experience

Software Developer, State of Michigan Apr. 2023 to Present

- Develop and maintain Salesforce applications using Apex, SOQL, and Lightning Web Components, shipping production features across multiple release cycles
- Build Python automation in Azure Pipelines for test coverage reporting, result retrieval, and release validation, removing manual handoffs from deployment workflows
- Complete 1,000+ targeted data corrections using SQL, SOQL, and Salesforce Data Loader while maintaining production data integrity
- Diagnose and resolve OpCon batch processing failures, restoring scheduled job execution and minimizing disruption to dependent business processes
- Coordinate code changes, releases, and production issue resolution using Git and Azure DevOps in an Agile workflow

IT Technician Level II, Mobile IT LLC Oct. 2021 to May 2022

- On-site and remote technical support for client staff across multiple sites

Support Analyst, Michigan State University Dec. 2020 to Jun. 2021

- Provided technical support to executive-level staff and utilized ticket routing

Deskside Support Technician, IBM Jun. 2019 to Apr. 2020

- Managed IT support tickets and resolved issues for end users remotely and in person with distributed IT teams

Projects

Merch Table: Self-hosted digital music storefront - merch-table.robsassack.com

- Built with Next.js, TypeScript, PostgreSQL, and Redis, containerized with Docker Compose
- Includes Stripe webhook-driven order fulfillment and a background FFmpeg worker for transcoding uploaded audio into multiple formats

Accordis: Real-time piano chord detection app - robsassack.github.io/accordis

- Built with Next.js, React, TypeScript, Tone.js, supporting both MIDI keyboard and on-screen input
- Features audio playback and a searchable chord and scale library with real-time detection

Education

Bachelor of Science, Western Michigan University, Kalamazoo, MI 2020

Major: University Studies; Minor: General Business

Relevant Coursework: Computer Science I & II, Database Management Systems, Systems

Programming Concepts, Computer Organization & Assembly Language, Intro to Web Technologies
